## **Jackson & Blanc Launches IES as Spin-Off of Controls Business**

*Integrated Energy Solutions (IES) Combines Years of Industry Experience With the Latest in Mechanical Controls Technology*

---

**San Diego, Calif. – April XX, 2006** – Integrated Energy Solutions (IES) today announced its official transition from operating as the Controls Division for well-established mechanical contracting firm, Jackson & Blanc, to becoming its own independent business. Already a recognized leader in the Building Automation industry, IES installs and maintains more than \$4 million in Building Automation components annually. Further, IES includes 14 full-time factory-trained installation and commissioning technicians. Complementing the installation team is a staff well-versed in system architecture and design who work directly with mechanical engineering firms and other design professionals to provide efficient, workable control systems.

IES entered the installation and maintenance of Building Automation Systems as part of the Jackson & Blanc family of services in 1985, to better assist building owners, facility managers and educational institutions in achieving efficient operations by providing energy-saving solutions. Supported by top-notch management and staff with more than 50 years combined experience, IES is well equipped to maintain the same high quality of service that its clients have come to expect.

### **IES Core Capabilities:**

- System Programming & System Engineering Assistance
- Thermographic Room Temperature Displays
- Real-Time Outside Air Temperature Conditions
- Full Color Graphics
- On-Site Application Programming
- On-Site WebControl® Hosting
- Remote Monitoring and Control
- In-House Customer Training Classes & Seminars
- 24-7 Emergency Response

“At IES, we have a responsibility to consistently provide our clients with energy-saving solutions that make a lasting and cost-effective impact,” said Weldon Maypole, general manager at IES. “I look forward to building upon the success we achieved with Jackson & Blanc to take IES to a new level. I’m proud to say that the strength of the company resides in our exceptional staff – a team of trained technicians whose solid knowledge of controls *and* mechanical systems results in a hassle free installation process.”

For more information on IES, please visit their web site at [www.integratedenergysolutions.net](http://www.integratedenergysolutions.net) or call 858-292-8642. IES is located at 9570 Ridgehaven Court, Suite B, San Diego, CA 92123.

**Jackson & Blanc:** Now celebrating its 75<sup>th</sup> year in business, Jackson & Blanc is Southern California’s pre-eminent mechanical systems specialist and have been serving the heating and air conditioning needs of San Diego specifically since 1931. What differentiates Jackson & Blanc from others in the industry is strong leadership in the design/build category and a ‘single source philosophy’ whereby they remain the sole contact for all of their customers needs. Jackson & Blanc’s customer list varies among commercial, industrial and institutional markets. They also specialize in retrofitting existing systems, preventative maintenance programs and service and repair for HVAC and other mechanical systems. For more information, please visit [www.jacksonandblanc.com](http://www.jacksonandblanc.com).
